

**Standard Parts.**  
**Ganter.**

Dear reader,

We hope you have had a good start to the new year! We wish you every success in 2025. To kick off the new year, we have some exciting new products for you! In our first newsletter, we present the new **rail t-mounting clamps GN 476.2** and the extension of our **sheet metal hinges GN 136**.

Also find out which trade shows you can meet us in February.

We look forward to another year of successful cooperation. If you have any questions, please do not hesitate to contact us.

Greetings from the Black Forest!

**Otto Ganter GmbH & Co. KG**

**NEW** Rail T-Mounting Clamps GN 476.2

Rail T-mounting clamps [GN 476.2](#) connect tubes and rods in a T shape. They are used for applications such as side guides, where the mounting clamps must not protrude to the side.

In addition, the split clamping point permits subsequent insertion of the mounting clamp into an existing structure and simplifies installation when axial insertion is not possible, such as due to curves.

**Extension** Sheet Metal Hinges GN 136

Sheet metal hinges [GN 136](#) are available in many different versions and are suitable for light to medium-duty applications.

Ganter now also offers type B (with through-holes) in a new stainless steel version with a black powder coating (NISW). This variant is used when reflections and glare from the shiny surface are undesirable. The stainless steel hinges (NI) were used as the basis for the coated hinges so that corrosion protection is still guaranteed.
