

Standard Parts. Ganter.

Dear reader,

In the second newsletter of this year, we present our new sensor holders GN 801.3 and GN 801.4 - now available as practical accessories for our toggle clamps. In addition we have expanded our range to include the rail mounting clamps GN 474.2, which offer secure fixing and easy handling.

Find out at which trade shows you can meet us soon to checkout our products up close!

Greetings from the Black Forest!

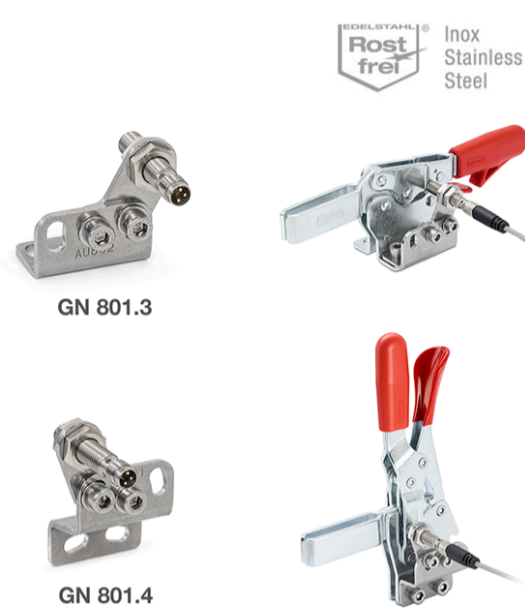

Otto Ganter GmbH & Co. KG

NEW Sensor Holders GN 801.3 and GN 801.4

Sensor holders [GN 801.3](#) and [GN 801.4](#) are designed as accessories for GN 810 and GN 820 series toggle clamps and enable contactless monitoring of the clamping positions using an inductive sensor.

When the clamping lever is in clamping position, the sensor electronics provide a high signal, e.g. to a machine control unit, and additionally indicate this switch status with an LED on the sensor.

NEW Rail Mounting Clamps GN 474.2

Rail mounting clamps [GN 474.2](#) connect tubes and rods in parallel or at right angles. They are used for applications such as side guides, where the mounting clamps must not protrude to the side.

In addition, the split clamping point permits subsequent insertion of the mounting clamp into an existing structure and simplifies installation when axial insertion is not possible, such as due to curves.
