

Standard Parts. Ganter.

Dear reader,

As we approach the end of the year, we would like to introduce another new product:
The **adjustable clamping levers GN 300.7** are the latest addition to our range. The special feature of this new design is the integrated stainless steel axial bearing clamping surface, which enables **significantly increased clamping force**.

As the year draws to a close, one thing remains particularly important to us:
saying **thank you**.

Thank you for your trust, your partnership, and the many successful projects we were able to realize together in 2025. We look forward to developing innovative solutions for you in the coming year and supporting your tasks with full dedication.

We wish you and your families a **Merry Christmas**, a relaxing holiday season, and a good start to the New Year!

Greetings from the Black Forest!
Otto Ganter GmbH & Co. KG

NEW Adjustable Clamping Levers with Increased Clamping Force GN 300.7

Adjustable clamping levers [GN 300.7](#) enable precise clamping and exceptionally user-friendly handling. Their integrated clamping surface is connected to the lever insert via a high-quality ball or axial bearing. The insert is made of robust stainless steel, ensuring high corrosion resistance and long service life. The result: improved clamping performance and gentler operation on the components.

Convince yourself

Frohe Weihnachten.

Merry Christmas.
Joyeux Noël.
Feliz Navidad.
