

## Standard Parts. Ganter.

Dear reader,

In February, we expanded our portfolio in two ways:

We now offer high-quality **cable glands** for a wide range of applications. In addition, our product group of couplings continues to grow – new **rigid couplings** stand out for their precision, reliability, and robust design.

We would also like to inform you about the trade shows in March where you can meet us in person. We look forward to connecting with you!

Greetings from the Black Forest!  
**Otto Ganter GmbH & Co. KG**

### NEW Cable Glands GN 62444

Cable glands [GN 62444](#) ensure reliable strain relief and sealing of electrical cables and wires in industrial equipment as well as in machine and plant construction. Ganter offers high-quality cable glands made of stainless steel, nickel-plated brass and plastic and can be ordered in various thread types.

Ganter offers a range of accessories to match our cable glands, consisting of:

- Mounting nuts [GN 62444.1](#)
- Threaded plugs [GN 62444.2](#)
- Multiple sealing inserts [GN 62444.3](#)
- Reducers [GN 62444.4](#)

Discover cable glands

### NEW Rigid Couplings

Rigid couplings connect supported shafts or are used as couplings for shaft extensions. They transmit angular positions as well as high torques / speeds with zero backlash and high precision, without compensating for misalignment or runout tolerances.

Thanks to its split design, [GN 2264](#) can also be used in applications where axial mounting is not possible. [GN 2260](#) and [GN 2262](#) feature a slotted design, ensuring particularly easy and convenient assembly.

### Upcoming Trade Shows

We will also be happy to present our new products to you in person at our trade show booth.

You can find us at the following trade shows in March:

[all about automation](#) in Friedrichshafen  
03/10/2026 - 03/11/2026  
Booth B2-317

[Solids](#) in Dortmund  
03/18/2026 - 03/19/2026  
Booth 4-A34
